MUHAMMAD HASAN

Finance & Supply Chain Operations | Supplier Management, Payables, Reconciliation & Process Improvement

muhammadhasan20001@gmail.com | Wildau / Berlin, Germany | linkedin.com/in/hasanmu | mhasan-eu.github.io

SUMMARY

Accountancy graduate and Business Master's student who bridges finance and supply chain: payables, reconciliation and month-end accuracy on one side, supplier coordination and process optimization on the other. Orchestrated 150 to 200M PKR in weekly SAP payment runs across 100+ suppliers with zero audit-trail gaps, safeguarded vendor master data at 98% accuracy by month-end, and accelerated team efficiency by 30% through process redesign. Detail-obsessed, results-driven and relentless in closing open issues.

EXPERIENCE

Night Auditor **Sep 2025 – Present**

Front Office GmbH *Berlin, Germany*

- Engineered 100% nightly reconciliation accuracy across a multi-property portfolio, as measured by zero unresolved variances at daily close, by cross-validating revenue and cash records against system-of-record data.
- Eliminated reporting errors at the source, as measured by every flagged discrepancy resolved before the daily management report, by root-causing billing and system conflicts and correcting records at origin.
- Institutionalized a standardized handoff protocol across all properties, as measured by uninterrupted next-day readiness, by autonomously closing each overnight cycle and documenting every handoff.

Finance Intern, Vendor & Payment Operations **May 2024 – Aug 2024**

Hoechst Pakistan Limited (formerly Sanofi-Aventis Pakistan Ltd.) *Karachi, Pakistan*

- Orchestrated the end-to-end invoice-to-payment cycle for 100+ suppliers, as measured by 150 to 200M PKR in weekly SAP payment runs with zero audit-trail gaps, by verifying invoices, calculating net payables and executing categorized online and cheque runs.
- Safeguarded vendor master data integrity across ~300 monthly transactions, as measured by 98% of ledger discrepancies cleared by month-end close, by reconciling payable ledgers against SAP vendor codes.
- Engineered weekly visibility into obligations across 40 to 50 suppliers, as measured by a refreshed report powering cash-flow planning every cycle, by building structured Excel tracking models.
- Secured supply continuity on 5 key supplier accounts, as measured by mismatch resolution faster than the team average, by escalating and closing open payment issues directly with suppliers.
- Mitigated supplier payment risk, as measured by average aging held below a 45-day threshold, by analyzing monthly aging data and flagging at-risk accounts ahead of escalation.
- Standardized ~150 monthly income and withholding tax entries into an audit-ready workflow, as measured by consistent accuracy at every review, by introducing uniform data-entry protocols.

Internet Service Representative **Oct 2021 – May 2024**

Breakthru (Apexchat) *Karachi, Pakistan*

- Accelerated lead follow-up efficiency by 30%, as measured by correct-channel routing rates, by co-architecting a categorization framework that standardized every assignment.
- Drove a 25% uplift in qualified leads for U.S. client companies, as measured by qualified lead volume, by pinpointing visitor needs and capturing complete, accurate data.
- Slashed repetitive inquiries by 10%, as measured by inbound query volume, by mining interaction data for recurring trends and rebuilding FAQs around them.
- Sustained a 98% customer satisfaction score across 100+ daily interactions, as measured by 80%+ of chats rated "very helpful", by consistently hitting a 20-second average response time.
